ROCKY RIVER ROCKS SHOW

It takes all types to make up a great event, and we're not short on providing just that at this year's IGA Newcastle Show.

In fact, how about a bit of Rocky River Mining. An interactive mining experience for the whole family in fact! Hands on participation on how and what it was like back in the days when mining for gold and precious stones was how folk made a quick dollar.

Children and adults can enjoy fossicking for gems like quartz, pyrite or sapphire and fossil treasures such as petrified wood, shark teeth and old coral. The Mill and Ross families have been involved in agricultural shows in Australia for five generations and are very involved in ensuring the patrons feel like they are in the world of the gold rush. It really can be a learning curve for all participants.

Just another taste of what you can expect at this year's IGA Newcastle Show. There really is so much more to take in. That's why.....

There are so many reasons to love your SHOW!

**** ends ****
